PREMIUM LEATHER CUT LEVEL B MIG WELDING GLOVE

MEDIUM CUT RESISTANCE B

- Premium Leather
- Heat Protection
- Reinforced Palm
- Reinforced Stitch
- Cotton Lining
- Exceptional Durability
- OEKO-TEX® Certified
- Extended Cuff
- LWG Certified
- Extensive Sizes 5-13

PREMIUM LEATHER CUT LEVEL B MIG WELDING GLOVE

MEDIUM CUT RESISTANCE B

- **Premium Cow Leather**
  Premium cow grain leather palm provides a strong combination of durability, flexibility and handling control for MIG welding and general fabrication work.
- **Enhanced Protection**
  A heavier leather construction provides increased protection against welding sparks, light spatter, heat and routine mechanical hazards while maintaining practical hand movement.
- **Cut Level B Protection**
  Certified to EN 388 Cut Level B, providing additional protection against moderate cut hazards encountered during metal handling and fabrication tasks.
- **Strategic Cut Protection**
  Cut-resistant protection is strategically incorporated within the palm area, where handling risks are greatest, without adding unnecessary bulk to the cuff.
- **Reinforced Palm**
  Cow split leather reinforcement across high-wear areas improves resistance to abrasion and mechanical wear, extending the glove's effective service life.
- **Secure Handling**
  Premium grain leather provides dependable handling control when working with welding equipment, tools and fabricated metal components.
- **Long Split Cuff**
  Extended orange cow split leather cuff provides durable coverage around the wrist and lower forearm against sparks, light spatter and abrasion.
- **Cotton Lining**
  Soft 100% cotton inner lining provides additional thermal insulation while improving comfort and moisture absorption during extended use.
- **Heat Protection**
  Leather construction and cotton lining provide protection against moderate heat, sparks and incidental welding contact within the glove's certified performance limits.
- **Aramid Stitching**
  High-strength aramid thread improves seam durability and provides enhanced resistance to heat, abrasion and mechanical stress.
- **Ergonomic Fit**
  Carefully shaped construction supports natural hand movement and secure handling, helping reduce fatigue during prolonged welding activities.
- **Low Linting**
  Carefully selected leather helps minimise lint and fibre shedding compared with conventional leather welding gloves, supporting cleaner working environments.
- **Certified Welding**
  Certified as Category II PPE and compliant with EN 12477:2001 Type A requirements, with applicable CE and UKCA conformity markings.
- **Responsible Sourcing**
  Leather sourced from Leather Working Group Gold-rated tanneries supports recognised standards for environmental management and responsible leather production.
- **OEKO-TEX® Certified**
  Tested and certified to applicable OEKO-TEX® requirements for harmful substances, supporting wearer safety and responsible material selection.
- **Traffi Colour System**
  Amber colour coding in line with the Traffi colour system enables quick identification of medium cut-resistant hand protection for appropriate task selection.

Technical Specifications

Size Range	5-13
Product Composition	Cow Skin Leather & Cotton
Colour	Off-white/Red

Packaging

Qty/Pack	10 Pairs
Qty/Case	40 Pairs
